Dear Pamela Monroe,

As a resident of New Hampshire I hope the SEC will reject Northern Pass's certificate.

Eversource and Hydro Quebec have both said they aren't paying for the project which raises the question whether either of the companies have the financial capability to build and operate this \$1.6 billion project. The transmission towers and lines are going to have a horrible effect on the landscape, historic sites, and the environment in New Hampshire. The transmission line also will not serve our state, as it merely passes through New Hampshire.

The Northern Pass has only short term gains, and that only has to do with the jobs that come with it but when the project is done so are the jobs. None of the electricity stays in New Hampshire, not one Kilowatt. So if there is only short term benefits and no long term benefits why are we even thinking about this? Tax Money? This will only affect the quality of peoples lives and it is not good.

I hope the committee will reject this project's certificate to prevent it from harming our state.

Thank you.

Sincerely,
Bret MacGregor
